Purchase Policy

Purchasing decisions can have a significant environmental, social and financial impact. Responsible procurement (or sustainable/responsible purchasing) is a process by which environmental, social and ethical considerations are considered when making a purchasing decision. Grecotel considers the following parameters:

- Whether a purchase is necessary: Every purchase must cover a real need of the hotel whilst considering the hotel category.
- The type of materials and products used: Priority should be given to recyclable and returnable products as well as to those from recycled materials, mostly paper, aluminum, glass, plastic. Avoid excessive multiple packaging because the more complex a product is, the more materials are used in its production and the more waste is disposed of into the environment.
- Under what conditions they have been manufactured.
- How far they have travelled: Product transportation is always an important factor to be considered, as it contributes to air pollution and fuel consumption, and the use of non-renewable sources of energy.

Priority will be given to products from local markets, progressively from a municipal, regional to state level, provided that they meet the basic standards and needs of Grecotel. Regarding the purchase of equipment, priority is given to the products that consume less water, energy and fuel and do not contain CFCs. Our environmental-friendly specifications are developed by Grecotel's Environmental Department in cooperation with the Purchasing Department on the basis of specific European Union and international regulations, and the latest scientific research and innovation.
